

Lukáš Henderson

I build apps with an AI fleet — and teach your team to run one.

byhenderson.com lukas@byhenderson.com

Services

Build your app

From first commit to the App Store — and kept running after launch.

Fixed-scope build	8–16 weeks
Architect or fractional CTO	Monthly, 2–3 days a week
Platform rewrite or rescue	Starts with a 2-week audit
Run it after launch	Monthly

Train your team

Live, in your codebase — not slides.

Workshop with a live proof of concept	1 day, up to 12 developers
Champion programme	6 weeks
Mentoring for tech leads	Monthly

Put agents into production

I build the systems that run the agents — then leave your team able to run them.

Leverage map	1–2 weeks
Agentic-engineering sprint	2 weeks
Custom MCP server	2–4 weeks

Websites that stay alive

Designed as a piece of work, built to last, and never left dark after launch.

Olivia Henderson Designer	
Design and build	4–8 weeks
Run it	Monthly

Prices on request: tell me the scope and I will send a fixed quote.

Products, all live

 Eve	evelinka.com	Architect and primary author
 Vitrinka	vitrinka.ai	Author, operated by LEFTEQ
 Reservine	reservine.io	Co-founder and frontend architect
 FixIt	fixit.app	Co-founder and CTO

The machine

Ten stations from a keystroke on my laptop to a watched production, across three servers: dev/CI, production and web.

About 1,100 CI jobs a day

47 apps, 30 production environments

38 agent guard rails

Figures As of September 2026
